

J. ADAMS

Entry-Level Technical Support Analyst

✉ Adams_joshua@outlook.com 📍 Ontario, Canada [in www.linkedin.com/in/adams444/](https://www.linkedin.com/in/adams444/) github.com/jadams-sec/Cybersecurity-Portfolio

PROFESSIONAL SUMMARY

Detail-oriented and analytical Cybersecurity professional with foundational expertise in security monitoring, incident response, and governance, risk, and compliance (GRC). Proven ability to securely handle high-volume sensitive data, manage cloud-based enterprise endpoints, and implement defensive security controls. Adept at leveraging modern technical frameworks and AI-powered tools to optimize incident triage, automate log analysis, and ensure regulatory alignment.

TECHNICAL SKILLS

Security Operations: Incident Response, Security Monitoring, Packet Analysis, Vulnerability Assessment

Technical Tools: Linux CLI, SQL (Log Filtering), Python (Automation & Debugging), Wireshark, Google Gemini, Generative AI Workflows, Prompt Engineering.

Frameworks & GRC: NIST Cybersecurity Framework (CSF), Access Control Lists (ACLs), Compliance Checklists, Risk Governance

CYBERSECURITY PROJECTS PORTFOLIO

Incident Response & Documentation (01_Incident_Response)

Developed a formal Security Incident Report and Incident Handlers Journal detailing containment, eradication, and lessons learned for an enterprise asset breach simulation.

Security Monitoring & Traffic Analysis (02_security_monitoring & 03_System_Hardening)

- Engineered optimized SQL queries to filter, isolate, and audit database access logs for unauthorized access patterns.
- Evaluated enterprise network traffic and baseline data using network protocol analyzers to identify anomalous payloads.
- Configured secure Linux file permissions and ownership attributes to enforce the principle of least privilege across system directories.

Scripting & Automation (04_Scripting_&_Automation)

- Created and debugged Python code designed to automate basic parsing of security logs and catch logic errors during threat triage simulations.

Governance, Risk, & Compliance (05_Risk_&_Governance)

- Formulated an enterprise Controls and Compliance Checklist and Security Organization Worksheet to map organizational assets against compliance standards and close security gaps.

PROFESSIONAL EXPERIENCE

Data Administrator / Analyst | Numeris

- Maintained strict data privacy protocols and compliance standards while securely processing high-volume consumer datasets and personally identifiable information (PII).
- Audited incoming tracking data for consistency and anomalies, ensuring information integrity before system integration.

Customer Experience & Operations Specialist | PetSmart

- Managed secure endpoint operations on enterprise, cloud-based Point-of-Sale (POS) systems, ensuring daily data synchronization and system availability.
- Enforced operational compliance standards regarding asset protection and handled sensitive data inputs in a high-traffic retail network environment.

CERTIFICATIONS & EDUCATION

Cybersecurity Certificate

The Chang School of Continuing Education, Toronto Metropolitan University | 2024-2026

Google Cybersecurity Professional Certificate

Google Career Certificates - Coursera | Completed Feb 2026

Overall Average: 97.95%

Google AI Professional Certificate

Google Career Certificates - Coursera | Completed Jun 2026
